**body#discover-latest-printed-kurti-set-for-woman > div#searchPopup > a.closeSearch**

Fix all of the following: Element is in tab order and does not have accessible text Fix any of the following: Element does not have text that is visible to screen readers aria-label attribute does not exist or is empty aria-labelledby attribute does not exist, references elements that do not exist or references elements that are empty Element has no title attribute

`<object>` elements have alternate text

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

## Failing Elements

### BEST PRACTICES

The document does not use `

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

`[user-scalable="no"]` is used in the `

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

#### head > meta

Fix any of the following: user-scalable=no on tag disables zooming on mobile devices

### NAVIGATION

`[accesskey]` values are unique

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

`[id]` attributes on active, focusable elements are not unique

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

#### div.wrap-newsletter > form.newsletter-form > div.input-group > input#Email

Fix any of the following: Document has active elements with the same id attribute: Email

### SUBSCRIBE

Fix any of the following: Document has active elements with the same id attribute: Subscribe

Heading elements are not in a sequentially-descending order

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

### SHOP BY CATEGORY

Fix any of the following: Heading order invalid

## COD available

Fix any of the following: Heading order invalid

No element has a `[tabindex]` value greater than 0

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

## TABLES AND LISTS

`<dl>`s contain only properly-ordered ``<dt>`` and ``<dd>`` groups, ``<script>``, ``<template>`` or ``<div>`` elements.

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

Definition list items are wrapped in ``<dl>`` elements

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

List items (`<li>`) are not contained within ``<ul>`` or ``<ol>`` parent elements.

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

## Kurta

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

## Kurta Sets

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

## Bottom Wear

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

## Night Wear

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

#### **Plus Size**

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

#### **Best Sellers**

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

#### **Print & Pattern**

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

#### **Blog**

Fix any of the following: List item does not have a

,  
parent element without a role, or a role="list"

Cells in a `

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

`<th>` elements and elements with `[role="columnheader"/"rowheader"]` have data cells they describe.

Low-contrast text is difficult or impossible for many users to read. [Learn more](#)

Passed audits

`[aria-hidden="true"]` is not present on the document `<body>`

Assistive technologies, like screen readers, work inconsistently when `aria-hidden="true"` is set on the document `<body>`. [Learn more](https://web.dev/aria-hidden-body/).

`aria-hidden="true"` elements do not contain focusable descendents

Focusable descendents within an `aria-hidden="true"` element prevent those interactive elements from being available to users of assistive technologies like screen readers. [Learn more](https://web.dev/aria-hidden-focus/).

`role`s have all required `aria-*` attributes

Some ARIA roles have required attributes that describe the state of the element to screen readers. [Learn more](https://web.dev/aria-required-attr/).

`role` values are valid

ARIA roles must have valid values in order to perform their intended accessibility functions. [Learn more](https://web.dev/aria-roles/).

Buttons have an accessible name

When a button doesn't have an accessible name, screen readers announce it as "button", making it unusable for users who rely on screen readers. [Learn more](https://web.dev/button-name/).

The page contains a heading, skip link, or landmark region

Adding ways to bypass repetitive content lets keyboard users navigate the page more efficiently. [Learn more](https://web.dev/bypass/).

Background and foreground colors have a sufficient contrast ratio

Low-contrast text is difficult or impossible for many users to read. [Learn more](https://web.dev/color-contrast/).

Document has a `<title>` element

The title gives screen reader users an overview of the page, and search engine users rely on it heavily to determine if a page is relevant to their search. [Learn more](https://web.dev/document-title/).

ARIA IDs are unique

The value of an ARIA ID must be unique to prevent other instances from being overlooked by assistive technologies. [Learn more](https://web.dev/duplicate-id-aria/).

`<html>` element has a `lang` attribute

If a page doesn't specify a `lang` attribute, a screen reader assumes that the page is in the default language that the user chose when setting up the screen reader. If the page isn't actually in the default language, then the screen reader might not announce the page's text correctly. [Learn more](https://web.dev/html-has-lang/).

`<html>` element has a valid value for its `lang` attribute

Specifying a valid [BCP 47 language](https://www.w3.org/International/questions/qa-choosing-language-tags#question) helps screen readers announce text properly. [Learn more](https://web.dev/html-lang-valid/).

Form elements have associated labels

Labels ensure that form controls are announced properly by assistive technologies, like screen readers. [Learn more](https://web.dev/label/).

Lists contain only `<li>` elements and script supporting elements (`<script>` and `<template>`).

Screen readers have a specific way of announcing lists. Ensuring proper list structure aids screen reader output. [Learn more](https://web.dev/list/).

`<video>` elements contain a `<track>` element with `kind="captions"`

When a video provides a caption it is easier for deaf and hearing impaired users to access its information. [Learn more](https://web.dev/video-caption/).

Serves images with low resolution
