Total Blocking Time

Cumulative Layout Shift

Values are estimated and may vary. The performance score is calculated directly from these metrics.See calculatorSee calculator.

Opportunities --These suggestions can help your page load faster. They do not directly affect the Performance score.

Opportunity

Estimated Savings

Diagnostics -- More information about the performance of your application. These numbers do not directly affect the Performance score.

0

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.
